## ABSTRACT OF THE INVENTION

This invention relates to a system for userinteractive multimedia based point-of-preview. The
apparatus has data storage for storge of discrete
increments of information intended for subscriber
selection and preview. After subscriber selection, a
programmable data processor selects from storage and
then transmits at least one discrete increment of
information to a display means for subscriber review.
Subscriber selection and profile data are collected
and stored. The invention also provides for
transmission of subscriber selection and subscriber
profile data to a central database for collection and
processing by the central processing unit. This
system is used, in a particular embodiment, to
preview audio programs on compact disks.
